About Norwegian Cruise Line

Since 1966, when we pioneered the very first Caribbean cruise, Norwegian Cruise Line has been the industry leader for innovation. From the first cruise line private island to Blue Man Group to our award-winning Free-style Cruising, we do things differently. You'll feel it with the passion and dedication of every team member you meet, you'll see it in our commitment to the environment and you'll know it when you experience the best cruise vacation you've ever had. Norwegian Cruise Line has a fleet of 13 ships.
